Cityscape Thumbnails

A thumbnail is a simple sketch done to work out, or study, a basic compositional layout

- Draw lightly in pencil
- This is mainly a line drawing with little or no details and/or shading
- Use your pencil as a sighting stick to study the angles of the lines in the projected images
- Concentrate on how objects overlap and the relationship between objects
- The objects in the thumbnail sketches must create an open composition. This means that the objects should appear to extend beyond three edges of the format.
