

Name: \_\_\_\_\_ Period: \_\_\_\_\_

Photoshop II Lesson 9: Typographic Design

1. A \_\_\_\_\_ is an object or a group of objects whose shape masks other artwork so that only areas that lie \_\_\_\_\_ the shape of the masking object are visible.
2. \_\_\_\_\_ are used to help establish alignment of elements within a composition. To add a guide you would first need to View > Rulers, then, drag a vertical or horizontal \_\_\_\_\_ from the ruler onto the composition.
3. When adding type to a composition you can enter \_\_\_\_\_ (a single letter, word, or line) or paragraph type.
4. What is the name of the green check icon visible when using the type tool? \_\_\_\_\_
5. You can make a clipping mask by holding down the \_\_\_\_\_ key and clicking between two layers, the \_\_\_\_\_ (top or bottom) layer will always be the clipping mask of the \_\_\_\_\_ (top or bottom) layer.
6. To change the spacing between letters you would need to adjust your \_\_\_\_\_ in the \_\_\_\_\_ panel. To change the spacing between lines of text you would need to adjust your \_\_\_\_\_.
7. To quickly select all of the type on a layer double click the "T" \_\_\_\_\_ icon on the desired layer.
8. When working with text you should ALWAYS use spell check. To access the contextual menu for the type tool, \_\_\_\_\_ click on the text and choose \_\_\_\_\_.
9. When using the Character panel to adjust type size, hold down \_\_\_\_\_ as you use the up and down arrow keys to change the size increment of type by \_\_\_\_\_ points.
10. To add an entire sequence of text to an image you need to \_\_\_\_\_ with the type tool to create a text box the desired size, before pasting in the copied text. If you \_\_\_\_\_ the bounding box, the type will reflow within the adjusted rectangle.
11. To ensure that multiple layers transform together you would first need to select the desired layers and then go to the Layers fly out menu and choose: \_\_\_\_\_ . Using \_\_\_\_\_ allows you to continue to edit both the contents of a layer (including type) and to edit a text warp after a transformation is complete.
12. To warp a rectangular shape choose: View > Show > Guides, zoom in for a closer look and then choose: Edit > Transform > \_\_\_\_\_. Adjust the handles to create the desired warp, or simply click the center of a horizontal line in the grid and drag the line \_\_\_\_\_ to create a curve.

\_\_\_\_\_/ 12 Each correct answer is worth 1 point, if any portion of the answer is wrong or left incomplete, no credit will be awarded.
